

March 19<sup>th</sup>, 2019

## STATICH: March newsletter

Dear STATICH collaborators,

We would like to thank you all for participating in STATICH. We will also congratulate **Motala Hospital** and **Lillehammer Hospital** for including their first participant in January and February. Well done!

### Status of the trial

As per March 2019, **9 participants** have been enrolled in STATICH. **20 centres** in Norway and Sweden are initiated, and Danish centres will also start including participants these days. We are pleased to welcome more centres in all three countries with initiation visits in the coming weeks and hope to see a steep increase in the participant inclusion rate.

### STATICH collaborators' meeting during ESOC: Thursday May 23<sup>rd</sup>

We would like to invite all collaborators to a 1-hour meeting during ESOC, on **Thursday May 23<sup>rd</sup> from 16.00 to 17.00 hrs.** We will circulate information about the venue nearer the time. Snacks and drinks will be served. Please let us know if you are planning to come: [k.t.larsen@medisin.uio.no](mailto:k.t.larsen@medisin.uio.no).

### Poster presentations at World ICH and ESO Conference in May

We will have posters at the World ICH meeting in Granada (<https://worldich.org/2019/Pages/default.aspx>), and ESOC in Milan (<https://eso-conference.org/2019>), and hope to see many of you there.

### RESTART will be presented at ESOC

RESTART (antiplatelet agents vs. no antiplatelet agents after ICH) has recently finished recruitment at over 500 patients and will present their results at ESOC 2019. We are awaiting this with great excitement and will discuss the results during our collaborators' meeting on May 23<sup>rd</sup>.

### Have you had problems with access to the randomisation system?

Please let us know if you have not received access to the randomisation system on [www.statich.no](http://www.statich.no), and we will help you.

We are grateful that you are looking out for patients that can be included into STATICH. Please don't hesitate to contact us whenever you have queries or would like to discuss. Every patient counts!

Best wishes,
