

Newsletter week 41, 2019

Dear STATICH collaborators,

October 8th, 2019

Trial status

We would like to thank **Bodø Hospital** for including their 1st participant, **Ålesund Hospital** for including their 4th participant, and **Akershus University Hospital** for including their 8th participant! **29 participants** are included into STATICH: **13 into STATICH-Antiplatelets** and **16 into STATICH-Anticoagulants**. Who will include participant number 30?

Updated STATICH documents

The *protocol* has been updated, and has been approved by the national ethics committees in Norway, Sweden and Denmark. The *Patient Information Leaflets and Consent Forms* have also been updated. The new documents will be sent to the Principal Investigator at each site. The documents can also be downloaded from www.statch.no.

Change to the protocol: Removal of the upper time limit for inclusion

We have removed the rule of maximum 180 days from the onset of ICH to inclusion into the study. Patients can be included after a minimum of 1 day after the ICH, with no upper time limit. However, brain imaging (preferably both CT and MRI) should be done during the last 180 days before randomisation, preferably during the last few weeks.

Changes to the Patient Information Leaflet and Consent Form

The forms now contain information that we wish to follow up the participant for *at least 2* years and that unidentifiable participant data might be transferred to the University of Edinburgh, for analysis of data from all trials that are currently on-going. Participants that are already included into STATICH do *not* have to sign a new consent form.

Reminder: STATICH collaborators' meeting during Bergenkonferansen

Time: Friday October 18th at 12.15-12.45 (the break just before lunch)

Place: Meeting room on the floor below the hotel reception, on the left-hand side

We hope you see you there! Please reply to k.t.larsen@medisin.uio.no if you have a chance to attend.

Thank you very much for your collaboration!

Best wishes,
